Staking and Minting explained

It is the act of watching ads in the Ad Minter, that "mints" tokens each day.
Minting is the creation of new tokens to the marketplace

- Mint tokens daily through ad views
- It takes only 7 seconds to mint 1 ad
- Every ad viewed within 24 hours receives equal share of tokens minted that day
- We mint 17,438 tokens each day
- The more ads you view, the more you earn
- Temporarily hold/stake your tokens to lift your minting limit by 1 ad per day
- Use, hold or exchange tokens easily

Asimi Minting Formulas

$$T_{AV} = \frac{M_D}{AV}$$

$$P_R = T_{AV} \times A$$

T_{AV} : Token reward per Ad View
M_D : Daily Minted tokens
AV : Daily company wide Ad Views
P_R : Personal Reward user receives
A : Personal number of Ad views

A marketplace for the future

We facilitate the minting of crypto currency tokens
through a combination of Proof of Work and Proof of Stake reward concepts.
